ERASMUS EXPERIENCE

My Erasmus experience at the University of Lower Silesia was amazing!

So for five months I had the opportunity to study abroad thanks to the Erasmus Program and I chose Poland as my destination. I had a similar experience the year before because I was in Barcelona for a year thanks to a Spanish program similar to Erasmus but inside the country. But I had never thought about studying in Poland from my beloved Sevilla before but Poland had the conditions that I was looking for the country for my Erasmus. Besides, I met so many of people whom were there before they loved it, so “why don’t I do the same”.

I never regretted it. I ended up studying in Wroclaw in the University of Lower Silesia and what a place it was to study abroad. The city is conquered by students. It had

food, fun, culture and a social life to rival anywhere in the world. Although studying wasn't really hard for me or any of my friends, I must admit I learned a lot. Maybe, the schedule of the lessons is a little bit confusing because at the beginning of the course we had just a few lessons but at the end we had so many of them. The social life, the friends I made and the experiences even a different point of view of my professors at the University was truly valuable. The University also offers many other activities for Erasmus students I had time to work, to have fun and to travel around the country and Europe.

People are so kind although they have their own way of living the life. Although it's not the same, it's still fantastic to be able to keep in touch with all friends and keep the opportunity to go back and see how the city has got on since the last time.

So my advice for anyone is, if you're given the opportunity to go to this place, do it. Erasmus experience in Wroclaw is amazing, is a wonderful city, cheap and full of different cultures. Don't lose the opportunity. You won't regret it.
